

ExpatBuddy packages

Introduction

Let us begin by informing you that ExpatBuddy is not a relocation agency. We help internationals during their settling down period to physically, socially and emotionally integrate! We are here to help the international to build a new life in a new environment. Included in this process we:

make sure your relocation and recruitment investment is a sustainable investment.

1/8 of the internationals that we welcome to the Amsterdam region, leave the companies within a year due to several circumstances such as:

- ➔ Relationship problems
- ➔ Lack of social network
- ➔ A career-blocked spouse
- ➔ Not knowing their way around
- ➔ The linguistic barrier
- ➔ Holland's poor service level.

Awareness & benefit

By being aware of this matter and acting on it, you'll benefit from it immediately. Be aware of the fact that expats have other values and that they hardly ever complain to the HR department and department managers to avoid asking too many questions. This is due to their cultural and professional ethics!

More value to your company

The ExpatBuddy packages we provide make sure the assignment will succeed and the expat is of more value to your company. Be aware that expats and spouses need a settling down period as soon as they have been relocated.

You as a HR manager or department manager will be securing your (department) investment by working with ExpatBuddy.

We're not just here to give you directions, we are here to lead the way!

Benefits for your company !

- Expats are able to focus on their job immediately.
- Increased productivity (and profit) by an employee at ease regarding family and surroundings.
- Protects company investment in recruitment and relocation by reducing premature departures of unhappy expats.
- Secures Managers and departments budget.
- HR won't be overloaded with non HR-related questions.
- If the expat and their family is more satisfied at home, the expat will be more productive at work.
